To Whom It May Concern,

On August 23, 2024, I performed a wellness exam on 3 year old Tennessee Walking Horse gelding named "Bay". His feet were picked up and handled for a hoof tester exam with no resistance and was not sensitive to hoof testers. His feet are noted to be needing a reset. He showed no signs of lameness on a hard surface in either direction and was negative to flexions. He appears healthy and free from communicable diseases his eyes are clear, teeth have some sharp enamel points but are within normal expectations and his heart and lungs auscultated within normal expectations. His skin is also within normal expectations with a healthy mane, tail and shiny haircoat.

This letter is in no way to be used as a guarantee of any type regarding the sale of "Bay". These are the examination findings on the day of exam. Future owners will need to talk with their veterinarian and formulate a wellness plan for their new horse.

A handwritten signature in black ink, appearing to read 'Belinda Mendenhall'. The signature is fluid and cursive, with the first name 'Belinda' being more prominent and the last name 'Mendenhall' following in a similar style.
