## **Certificate of Examination**

DATE: 09.16.2025

PLACE OF EXAMINATION: Finish Line Equine Surgery - 515 Finish Line Avenue, Ranson, WV 25438

EXAMINATION FOR: John Flaughter

HORSE NAME: Princess

BREED: Arabian Horse SEX: Mare AGE: reported 12 year old

COLOR: Grey

INTENDED USE - Sale entry

BEHAVIOR: Alert and Responsive

OVERALL APPEARANCE: Lean but overall acceptable body condition for breed.

### SYSTEMS EVALUATION:

TEMPERATURE: 99.4 F

PULSE: 36 bpm

RESPIRATIONS: 20rpm

HEART: auscultation within normal limits

RESPIRATORY: rebreathing test - normal both lungs auscultation, no nasal discharge or cough detected

OPHTHALMIC (EYES): Non dilated exam only - No significant abnormalities detected. Mild dilatation of the retinal vasculature in R eye (one focal area only, likely incidental finding)

NEUROLOGICAL: No abnormalities detected.

INTEGUMENT (SKIN): No melanoma detected.

GASTROINTESTINAL: Normal gut sounds

MUSCULOSKELETAL :

- RH - at the time of examination, focal edema/swelling over the dorsal aspect of RH cannon, around the extensor tendon (likely happened during transport). Painful when pressure is applied.
- RF foot - Chronic but non-active hoof crack, no reaction on hoof testers.
- The horse had shoes in both front feet.

CLINICAL SIGNS OF ILLNESS : None identified at the time of examination.

REPRODUCTIVE: Filly. No Caslick.

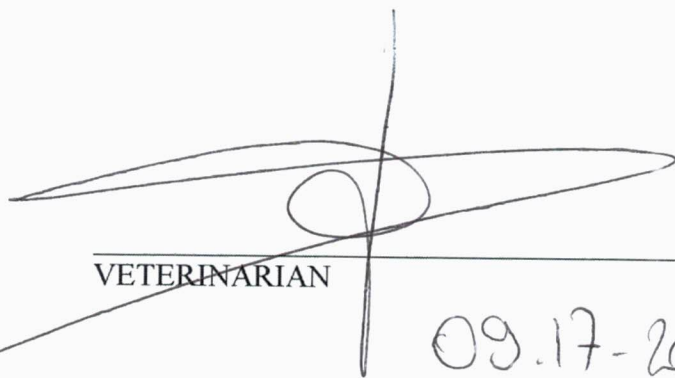

MOUTH: No detailed dental examination performed. Slanted Incisors conformation. The horse could be older based on incisors appearance.

EVIDENCE OF NERVING: None

CLINICAL SIGNS OF LAMENESS: No clinical signs of lameness at trot in straight line on asphalt. Gaited.

FLEXIONS: No limb flexion was performed.

*Treatment at the time of examination: The horse was vaccinated against Flu / Rhino/ EEE / WEE / WNV /TETANUS, Potomac Horse Fever and Rabies on 09.16.2025. A fresh Coggins was also pulled at that date.*
